RAIL TRAFFIC AND NEW RAIL CONSTRUCTION
HANG-CHOU, CHINA

Hang-chou is the location of important railroad repair and classification yard facilities and is the transportation center of Chekiang Province. It is situated on the Shanghai/Canton rail line, 100 miles southwest of Shanghai.

Transportation facilities throughout China reportedly have been heavily taxed by increased economic activity. However, there is no photographic evidence of over-taxed facilities at Hang-chou. Study of the latest available aerial photography [REDACTED] indicates no excessive freight pile up or rail traffic congestion in Hang-chou. Not more than 20 percent of the rail yard trackage was being utilized on the above dates.

25X1D

25X1D

Several new rail spurs totalling 10 1/2 miles of track, one 4-6 track marshalling yard, and several small storage yards have been constructed in the Hang-chou area since [REDACTED]. This construction is indicated on the accompanying map and described in the key to annotations which also lists approximately 240 rail cars present in the area on [REDACTED]. The quality of [REDACTED] photography precludes detailed rail car description.

KEY TO ANNOTATIONS

25X1D

1. Rail spur under construction, to serve small steel plant.
2. New rail spur 1,500' long, constructed since [REDACTED] serving an industrial site.
3. New rail line 6.5 miles long, constructed since [REDACTED] 25X1D
4. New rail spur 1.6 miles long, constructed since [REDACTED] serving ammunition storage area. 25X1D
5. Rail spur under construction, to serve industrial site.
6. New rail spur 1,700' long, constructed since [REDACTED] serving in- 25X1D
dustrial site.
7. Rail spur, abandoned since [REDACTED]. Roadbed has been converted 25X1D
to highway use.
8. Small railroad yard, constructed since [REDACTED] consisting of 4-6 25X1D
tracks.
9. Ken-shan railroad yard. No change since [REDACTED] No rail cars 25X1D
observed.
10. Main railroad yard. No evidence of any change since [REDACTED]. In 25X1D
[REDACTED] approximately 30 percent of the yard's trackage was occupied
with 53 boxcars, 23 passenger cars, and 3 low-sided gondolas. 25X1D
11. Railroad yard. No change since [REDACTED] No rail cars observed. 25X1D
12. New rail spur 1.1 mile long, constructed since [REDACTED] serving a 25X1D
new industrial plant.
13. New rail spur 1,000' long, constructed since [REDACTED] serving open 25X1D
storage area.
14. New rail spur 2,300' long, constructed since [REDACTED] serving open 25X1D
storage area.
15. Hang-chou Storage Area No. 5. Eight new warehouses constructed 25X1D
since [REDACTED]
16. Ningsing railroad yard. No change since [REDACTED]
approximately 10 percent of the yard's trackage was occupied with
130-140 boxcars, 10 possible low-sided gondolas, and 4 tank cars.
17. Railroad yard. No change since [REDACTED] No rail cars observed. 25X1D
18. Approximately 15 boxcars on rail siding at Hang-chou port area.
19. Railroad yard, probably abandoned.
20. Railroad yard. No change since [REDACTED] Several possible box
cars in yard.
